| | |
|---|---|
| PROGRAMMING LANGUAGES | C, Java, Python |
| LIBRARIES/FRAMEWORKS | Javascript, HTML |
| TOOLS / PLATFORMS | GIT |
| DATABASES | SQL |

## PROJECTS / OPEN-SOURCE

**ONLINE EVENT MANAGEMENT SYSTEM**                                                          Java & SQL

The Event Management System is a sophisticated software application developed using Java
programming and object-oriented principles. This dynamic system offers a graphical user interface (GUI)
and
caters to the needs of faculty, students, and coordinators within educational institutions. It simplifies event
planning, registration, and management through its intuitive and interactive features.
